## INTRODUCTION

This index to local and state news in the Fort Wayne News-Sentinel covers the period January to December, 1987. During this period Fort Wayne elected a new mayor; the Fort Wayne Community Schools settled its discrimination case with the U.S. Education Department's Civil Rights Office by agreeing to expand the magnet school program; a major chemical fire at Maumee Valley Seeds forced evacuation of hundreds of people; the Maumee River Basin Commission was formed to deal with regional flood control. The Headwaters Park Commission was formed to create a downtown park. Two hospitals announced plans to move some operations to the suburbs. Downtown development and Midtowne Crossing were key issues along with AIDS, hazardous wastes, landfills, the state of the county's budget, police morale and public safety.

Nearly 19,000 entries in the index are arranged in subject order and provide the date, page, section and article headline. Editorials, charts, photos and illustrations that accompany an article are noted. Photo-essays are identified by the word "photo" preceding the headline.

Government agencies are listed in keyword fashion under the name of the unit to which they are attached. For example, Indiana's Department of Natural Resources is listed under "Indiana . Natural Resources, Dept. of".

Obituaries, marriage and anniversary notices and most items about meetings of organizations are omitted. The Allen County Public Library maintains an obituaries index.

Because the index is created primarily for IPFW students studying local issues, sports news receives only superficial indexing. Look for most articles under the name of the sport. Only tournament games are indexed.

Editorials on all subjects are included in the index. Also indexed are guest editorials (labeled "guest"). Letters to the editor, when they represent the position of an organization or an elected official, are also covered in the index.

This is the tenth year we have provided local newspaper indexing. We appreciate the continued support of the IPFW Library. This year we would like to thank especially Ted Hunsberger who helped automate the index using dBASE III+, and Ann Rudig and James Lanning who did much of the data input.
